

Dear FCC;

I feel that it is very important that the airwaves continue to be free, as they historically have been. It would be unreasonable to grant such total control of anything to the broadcasting stations. There should always continue to be the opportunity for the public to record broadcasted audio/video materials for their own personal use. For example, I should not have to purchase a movie that was broadcast when I was not home, in order to be able to watch it.

Please do not give broadcasters the opportunity to prevent us from recording things for our personal use.

Thank you for your time and attention to this matter,  
Deb Schwalenberg, KF0GJ
